

Safety: Confined Space Entry Procedures

This course covers information about confined spaces, hazardous atmospheres, necessary equipment, and permits. The intent of the course is to provide the learner with information about the hazards and hazard control methods that will permit safe work in enclosed work areas or confined spaces.

Objectives:

- Define a confined space
- Identify hazards associated with confined spaces
- Identify the classifying requirements of permit required and non-permit required confined spaces
- Define terms associated with confined space such as enclosed space, entry, authorized entrant, and attendant
- Define hazardous atmosphere and identify conditions that produce a hazardous atmosphere
- Identify equipment needed for confined space entry
- Specify pre-entry requirements for confined space
- Recognize permits posted at points of entry to a confined space and specify their purpose and use
- Identify the duties and responsibilities of a confined space attendant

Audience: Employees who are assigned work in and around work areas that have been identified as confined spaces

Primary Regulations: OSHA 29 CFR 1910.146, Permit-Required Confined Spaces

Related Regulations: OSHA 29 CFR 1910 Subpart Z, Toxic and Hazardous Substances

Duration: 45-60 minutes
