

Safety: Hazard Communication Requirements

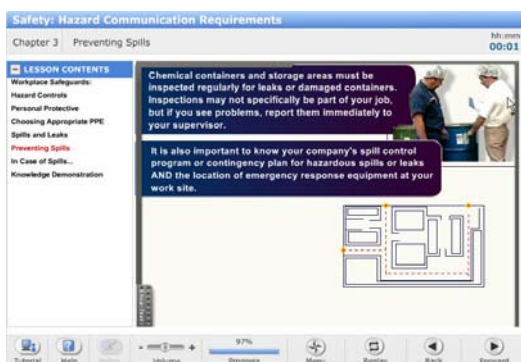

This course covers information required by the Hazard Communication Standard. The course provides the learner with an overview of OSHA's Hazard Communication Standard, which requires that hazardous materials used at the work site are identified, labeled, handled, used, and disposed of properly. The intent of the information is to help prevent or minimize employee exposures to the materials and minimize accidental releases of the material to the work environment.

Objectives:

- List topics required in an OSHA-compliant Hazard Communications program
- Identify the three chemical states
- Identify employer responsibilities and employee responsibilities under the Hazard Communication Standard
- Identify the company's goals (which include OSHA's requirements) for the Hazard Communication Standard
- Identify Federal agencies that regulate workplace chemicals

Audience: All persons who will be in work areas where specific job-related hazards (flying/falling objects, hazardous materials, high noise levels, respiratory hazards, exposure to temperature extremes, potential exposure to energy sources, fall potentials, etc.)

Primary Regulations: OSHA 29 CFR 1910.1200, Hazard Communication

Related Regulations: OSHA 29 CFR 1910.1450 Lab Standard; OSHA 29 CFR 1910 Subpart Z, Toxic and Hazardous Substances; OSHA 29 CFR 1910.119, Process Safety Management; OSHA 29 CFR 1910.120, Hazardous Waste Operations and Emergency Response

Duration: 45-60 minutes
