

Safety: Hearing Conservation Procedures

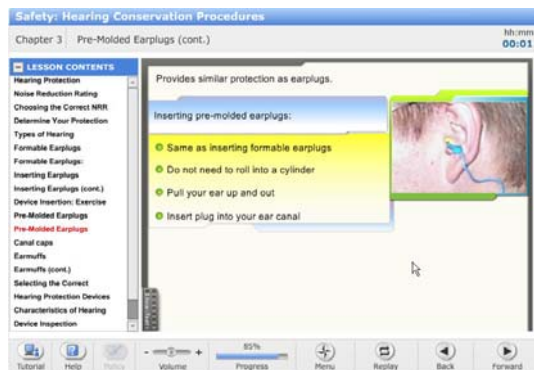

This training course provides information to help employees prevent noise-induced hearing loss. It also explains the purpose and components of a Hearing Conservation Program.

Objectives:

- Identify the effects of noise on hearing
- Identify the purpose of OSHA's Hearing Conservation Program
- Specify the purpose and procedures of audiometric testing
- Specify the purpose of hearing protectors and the advantages and disadvantages of the various types
- Specify the proper fitting, use, and care of hearing protectors

Audience: Individuals who work at jobs that endanger their hearing.

Primary Regulations: OSHA 1910.95, Occupational Noise Exposure

Related Regulations: None

Duration: 45-60 minutes
