

Safety: Indoor Air Quality Control for Supervisors

The goal of this course is to provide supervisors with the tools needed to help prevent and correct indoor air quality problems in their building or work areas. It recommends practical, actions that can be carried out by facility management, maintenance personnel and building occupants. The course will help you to integrate IAQ-related activities into your existing organization and identify which of your staff have the necessary skills to carry out those activities.

Objectives:

- Define Indoor Air Quality problems.
- Discuss the importance of IAQ in the workplace.
- Discuss the need for maintaining an IAQ program.
- Discuss the basic steps required in an IAQ program.
- Identify the health effects associated with poor air quality.
- Identify the hazards of not maintaining good air quality.
- Discuss the general concepts of toxicology.

Audience: All personnel who must be informed about IAQ issues.

Primary Regulations: ASHRAE Standard 62-1989, Ventilation. ASHRAE Standard 55-1981, Thermal Environmental Conditions for Human Occupancy.

Related Regulations: None

Duration: 45-60 minutes
