

Safety: Machine Guarding Control Procedures

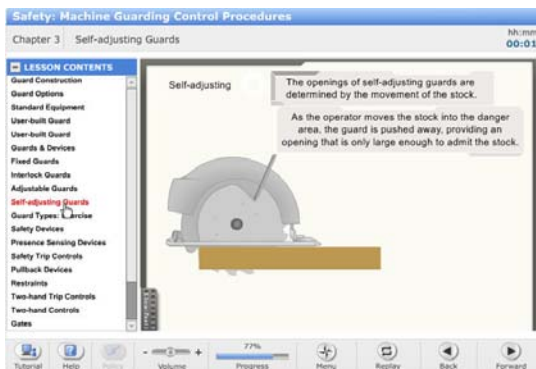

This course provides definitions and requirements for different kinds of machinery with regard to the Machine Guarding Program. It provides a general discussion of various guarding methods, and defines terms associated with Machine Guarding.

Objectives:

- Identify types of machine guarding
- Define "Point of operation guarding"
- Identify examples of machinery that require guarding
- Specify the purpose and the requirements of a Machine Guarding Program

Audience: All employees who use power tools and machines during the course of their work.

Primary Regulations: OSHA 29 CFR 1910.212, Machine Guarding Requirements

Related Regulations: OSHA 29 CFR 1926.300, Tools, Hand and Power, General Requirements

Duration: 45-60 minutes
